

Assemblin Caverion Group continues supporting John Nurminen Foundation in their work to save the Baltic Sea

News article

12 November 2025 at 09:00 CET

Assemblin Caverion Group continues its support as one of the key partners of John Nurminen Foundation. The Foundation's mission is to save the Baltic Sea and its heritage for future generations.

"The Baltic Sea is our geographical heart, but unfortunately, it is facing severe challenges. We want to do our part and show support for the work to save the Baltic Sea not only with our donation but also with the work we do together with our customers for more resource-efficient built environment", says **Mats Johansson**, the President and CEO of Assemblin Caverion Group.

"The small and shallow Baltic Sea suffers from the effects of climate change faster than many other ocean areas. Increasing rainfall intensifies the nutrient runoff from land to sea, while higher sea water temperatures exacerbate oxygen loss on the sea floor. Since climate change reinforces the biggest problem of the Baltic Sea, eutrophication, saving the Baltic Sea also requires climate action. Thanks to Assemblin Caverion Group's donation, we at John Nurminen Foundation can continue our long-term, concrete efforts to protect the sea", says **Annamari Arrakoski-Engardt**, the CEO of John Nurminen Foundation.

"We want to be part of the solution. Therefore, it is important for us to play our role in improving the sustainability of the built environment, and through this partnership, also of the Baltic Sea", concludes **Jacob Götzsche**, the Executive Chairman of Assemblin Caverion Group.

Caverion, now part of Assemblin Caverion Group, has been supporting John Nurminen Foundation since 2021.

Assemblin Caverion Group delivers sustainable installations, technical services and solutions along the lifecycle of the built environment to support our customers achieve their goals.

John Nurminen Foundation – Saving the Baltic Sea

Founded in 1992, the purpose of the John Nurminen Foundation is to save the Baltic Sea and its heritage for future generations. The Foundation's projects improve the status of the Baltic Sea by reducing the nutrient load and environmental problems, such as eutrophication and nature loss, faced by the sea. The Foundation's tasks also include safeguarding, celebrating and communicating the stories and cultural heritage of the Sea. The work is steered by measurable results and impact. The Foundation's operations are mainly funded by donations and grants. www.johnnurmisenensaatio.fi/en

About Assemblin Caverion Group

Assemblin Caverion Group is a leading northern European technical service and installation company. The Group employs about 20,000 skilled professionals in nine countries, sharing the passion for smart and sustainable solutions. We deliver installations, technical services and solutions along the full lifecycle of the built environment to support our customers and their increasing demand for energy efficiency, sustainability, and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the combination of Assemblin Group and Caverion Corporation. Our combined revenue amounts to approximately SEK 41 billion/ EUR 3.6 billion.
