

MTU Aero Engines AG extends its partnership with Caverion in Germany

Press release

Tuesday 15 April 2025 at 10:00 CET

MTU Aero Engines AG extends its partnership with Caverion in Germany

Caverion continues to be responsible for the technical facility management at MTU Aero Engines' Munich site for another contract period. The contract is a continuation of a long partnership already over 10 years.

Caverion's onsite team covers technical maintenance of building systems, such as heating, plumbing, air conditioning, refrigeration, ventilation and technical gases, building automation and electricity. The total area of the site is around 400,000 m².

As MTU Aero Engines' partner, Caverion will continue to support them in meeting their greenhouse gas reduction targets at the Munich site. By 2030, MTU Aero Engines aims to reduce their emissions at all their sites by 60% compared to the reference year 2019. Based on regular energy inspections and energy audits conducted by Caverion, experts can identify potential energy savings at the site and opportunities for modern systems in existing buildings.

"Caverion is a trusted partner for us, and we appreciate the service team's many years of experience and deep understanding of the requirements we face in production," says **Paul Koop**, Senior Manager of Technical Facility Management, MTU Aero Engines.

"Our team has strong expertise in technical facility management, which ensures high quality of services. We are confident that we are the right partner for MTU Aero

Engines in the complex challenges at the Munich site in the future too,” adds **Manfred Simmet**, EVP and CEO, Caverion Germany.
